Date of entry: Fall 2021

YOUR ROLE

Reporting to the Head of Administration, the responsibilities of the Director of Operations are to provide leadership for all functions of the municipal operations and infrastructure division. As Director of Operations, you will work with the leadership team to shape and implement strategic and operational leadership. You will be responsible for optimizing the operations function to meet the needs of the organization. You will support the organization as it evolves, and you will contribute to the planning, management and implementation of projects while ensuring the engineering and operation of operations and infrastructure.

THE IDEAL CANDIDATE

As a future member of the management team, you are a natural collaborator with strong technical skills in civil-municipal engineering as well as excellent interpersonal and communication skills.

You are fluent in both official languages, with experience as an executive. Ideally you have combination of experience from the private sector and from the public / municipal sector. You are an accredited professional in Canada, have a post-secondary degree as well as relevant experience in civil / municipal engineering and personnel management.

You have a well-deserved reputation for finding solutions to sometimes complex problems. You have experience working in a unionized environment and your experience allows you to manage effectively and with confidence. You have the ability to communicate information in a clear and concise manner, confidently present reports and make recommendations based on in-depth analysis and reliable risk assessment. You are efficient and have the ability to work both strategically and practically and recognize opportunities for improvement. Analytical and detail-oriented, you are a planner and a champion of occupational health and safety.

You are a respected and trusted advisor and decision-maker. Your leadership style is inclusive, and you inspire your teams to reach new heights of creative thinking, dedication and continuous improvement. You have a solid technical knowledge of the full range of functions required by municipal engineering.

Clever, knowledgeable and detail-oriented, you have excellent analytical, problem-solving and decision-making skills. You have personal values

and a strong work ethic. You earn the respect of your internal and external colleagues by encouraging their contributions and by remaining flexible and open-minded. You will bring a wealth of relevant knowledge and experience to this role and set an example by working together towards our shared vision; that of offering optimal service to the residents of this magnificent city!

OUR CLIENT

THE CITY OF CAMPBELLTON

Is one of the eight New Brunswick municipalities that hold city status. Located in the heart of the Appalachians, it borders the province of Quebec as well as the shores of the famous Restigouche River and Baie-des-Chaleurs;

A regional service center, the city of Campbellton maintains close ties with the surrounding villages and municipalities, thus constituting a pool of more than 25,000 residents who regularly frequent its territory and take advantage of the services offered. With a population of nearly 7,000, Campbellton has an annual operating budget of over \$ 14 million and employs up to 80 employees. Services are provided by a team of senior executives dedicated to providing quality performance, as well as fostering social, cultural, environmental and economic development in their community, while aiming to maintain and improve the quality of life for its residents. inhabitants.
